

Square Tape Clamps

DAR's Square Tape Clamps are precision-engineered for creating cross, straight through, or tee joints in flat tape. These four-way connectors are constructed from phosphorus bronze, ensuring superior durability and performance. The base of the clamp features a countersunk hole in the center, allowing for secure attachment to the building surface. The lid is affixed using four screws, providing a robust and reliable connection. DAR's Square Tape Clamps are an essential component in any electrical installation, offering both functionality and reliability.
