

One Hole Tinned Copper Lug

DAR Tinned Copper One-Hole Terminal Lug, a type of electrical connector designed to terminate a single electrical wire. Our terminal lug is made of copper and coated with a thin layer of tin to prevent corrosion.

Key features of the DAR Tinned Copper One-Hole Terminal Lug include:

1.
- Secure Connection: Our terminal lug provides a secure and reliable connection between the wire and the terminal.
2.
- Corrosion Resistance: The tin coating on the copper lug prevents corrosion, ensuring the longevity and effectiveness of the connection.
