

Inspection Earthing Pit

Introducing the DAR Concrete Earth Pit, a pre-fabricated pit made of high-strength concrete material designed to house the earthing electrode and its connections. Our concrete earth pit offers superior protection to the earthing system, ensuring its longevity and effectiveness.

Key features of the DAR Concrete Earth Pit include:

- 1. Protection: Our concrete earth pit protects the earthing electrode and its connections from physical damage.
- 2. for easy inspection and maintenance of the earthing system.
- 3. Durability: Made of high-strength concrete material, our earth pit is built to withstand harsh environmental conditions (17 Ton).

Code	Size
DAR-IEP25	25X32X32 CM

Earthing bar	L (mm)	W (mm)	H (mm)	Height mm
5 H x Ø10mm	FIT TO EARTH PIT	50	5	96
